

JUSTIN KROMETIS

Wright House, RM 202, Virginia Tech ◊ 765 West Campus Dr (MC0531) ◊ Blacksburg, VA 24061
(540) 231-8793 ◊ jkrometis@vt.edu ◊ <https://krometis.github.io>

RESEARCH INTERESTS

Statistical Inverse Problems, High-Performance Computing, Computational Science, Parameter Estimation, Uncertainty Quantification, Machine Learning

EDUCATION

- Virginia Tech** *May 2018*
Ph.D. in Mathematics
Dissertation: A Bayesian approach to estimating background flows from a passive scalar
Advisors: Dr. Jeff Borggaard (Virginia Tech), Dr. Nathan Glatt-Holtz (Tulane)
- Virginia Tech** *May 2004*
M.S. in Mathematics
Graduate Thesis: Lane Preference in a Simple Traffic Model
Advisors: Dr. Beate Schmittmann (Physics), Dr. George Hagedorn (Math)
- Virginia Tech** *May 2004*
B.S. in Physics, summa cum laude
- Virginia Tech** *May 2002*
B.S. in Mathematics, summa cum laude

ACADEMIC APPOINTMENTS

- Advanced Research Computing, Virginia Tech** August 2011 - Present
Computational Scientist *Blacksburg, VA*
- Conduct research in topics related to scientific computing
 - Support Virginia Tech faculty and grad students in conducting and optimizing research using high performance computing (HPC)
 - Lead rollout of new HPC resources to users, including performance benchmarking (HPL, STREAM) and optimization
 - Guest lecture for classes in Math, Statistics, CMDA, and other departments
 - Teach short courses on HPC and parallel programming
 - Build and install software packages, from math, I/O, and MPI libraries to higher-level packages
 - Work with system administrators to implement policies or streamline operations
 - Write documentation and best practices for cluster usage
- Mathematics Department, Virginia Tech** January 2011 - August 2011
Curriculum Development Assistant *Blacksburg, VA*
- Assisted Dr. Lizette Zietsman with development of Math in a Computational Context, the first course in the Math department's reorganization of its curriculum for freshmen and sophomores

PROFESSIONAL EXPERIENCE

- IEM, Inc.** December 2005 - August 2011
Division Projects Lead, Senior Transportation Analyst *Morrisville, NC*
- Florida Catastrophic Planning: Led wide-ranging effort to model impacts of catastrophic hurricane; Organized and participated in large-scale workshop for federal, state, and local officials

- Developed evacuation models for nuclear, chemical, and natural hazards, including publicly-assisted multimodal evacuation of New Orleans
- Developed software tools to automate accounting and project management tasks
- Contributed to the development of the first Statewide Travel Demand Model for North Carolina
- Led development of winning proposal for \$2.5 million contract

North Carolina Department of Transportation

September 2004 - December 2005

Traffic Modeler

Raleigh, NC

- Travel Demand Modeling: Contributed to development of traffic models used for transportation planning; Developed tools to automate processing of home interview surveys; Created techniques to project traffic volumes in rural areas

GRANTS

NYC Regional NVA Scenario-Specific Vulnerability Measures. IEM, Inc. 2013.

INVITED TALKS, CONFERENCE PRESENTATIONS, AND POSTERS

Numerical Analysis Seminar, Math Department, Virginia Tech, 19 February 2021.

American Mathematical Society Fall Western Sectional Meeting, 25 October 2020.

Hausdorff School on MCMC: Recent developments and new connections, 15 September 2020.

Fall Fluid Mechanics Symposium, Virginia Tech, 4 November 2019.

Fluids Seminar, Math Department, Virginia Tech, 25 October 2019.

Recent Advances in Infinite Dimensional Stochastic Analysis Minisymposium, International Congress on Industrial and Applied Mathematics, 17 July 2019.

Spring Research Conference, Institute of Mathematical Statistics and the American Statistical Association, 24 May 2019.

Departmental Colloquium, Math Department, Virginia Tech, 22 February 2019.

Fluids Seminar, Math Department, Virginia Tech, 8 November 2018.

Probability and Statistics Seminar, Tulane University, 29 November 2017.

Math Harmonic Analysis and PDE Seminar, Math Department, University of Virginia, 10 October 2017.

Probabilistic Perspectives in Nonlinear PDEs Workshop, International Centre for Mathematical Sciences, June 2017 (Poster).

Math Department Seminar, Brigham Young University, 9 February 2017.

FOMICS Winter School on Uncertainty Quantification, Institute of Computational Science (ICS), University of Lugano, Switzerland, 18 December 2016 (Poster).

Math Department Seminar, Tulane University, 7 November 2016.

Gene Golub SIAM Summer School, Drexel University, August 2016 (Poster).

If the Curve Fits, Wear It: Applicability and Transferability of Disaggregate Curves for Small and Medium Sized Communities. Transportation Research Board (TRB) Tools of the Trade Conference, September 2012.

Modeling Mass Evacuation Staging Centers: A Case Study in New Orleans. National Evacuation Conference, February 2010.

Invited Speaker, Virginia Tech Physics Department Awards Ceremony, April 2009.

Modeling of the Evacuation of Carless Populations from Jefferson and Orleans Parishes in Louisiana. FEMA Mass Evacuation Transportation Planning Contraflow Workshop, January 2009.

TEACHING AND COURSE DEVELOPMENT

Full Semester Courses:

- Math in a Computational Context (Math 2984H), Spring/Summer 2011 (Assisted Dr. Lizette Zietsman with course development)
- Vector Geometry (MATH 1224), Fall 2003

Guest Lectures for the Following Courses:

- Computer Science Foundations for Computational Modeling and Data Analytics (CMDA 3634), October 2020, March 2020, February 2020, November 2019, October 2019, February 2019, December 2018, November 2018, October 2018, April 2018, December 2017, March 2016
- Advanced Statistical Computing (STAT 6984), April 2020, March 2020, February 2020, November 2017
- SIAM Student Seminar, February 2020
- Computing Skills for CMDA (CMDA 1984), November 2019, September 2019
- Remote Sensing Interdisciplinary Graduate Education Program (IGEP), September 2019
- Math in a Computational Context (Math 2405, formerly 2984H), October 2019, November 2014, October 2013, September 2012, October 2011
- Finite Elements and GPU Computing (MATH 5414), September 2018
- Metagenomics Workshop, Civil and Environmental Engineering, July 2018
- INFORMS Graduate Seminar, April 2018
- Programming for Geospatial Research (GEOG 4984), February 2018
- Industrial Systems Engineering Graduate Seminar (ISE 5024), October 2017
- Topics in Applied Mathematics: Finite Elements & GPU Computing (MATH 5414), September 2016
- Physics Department First Year Experience (PHYS 2326), May 2016, May 2015
- Programming and Mathematical Problem Solving (Math 3054), May 2015, April 2012
- Dynamics of Water and Societal Systems Research Experience for Undergraduates (REU), July 2013, June 2012
- Integrated Science Lab (COS 2984), September 2012, January 2012

Short Courses for Faculty and Graduates Students:

- Distributed-Memory Programming in MPI
- Shared-Memory Programming in OpenMP
- Linear Algebra Libraries
- Numerical Computing in Julia
- Parallel Matlab
- Parallel R
- Programming for the Intel Xeon Phi Architecture
- Introduction to Advanced Research Computing Resources and User Environment
- Introduction to High Performance Computing

MENTORING

Christian Frederiksen, Ph.D. Student, Tulane

Kameron Lightheart, M.S. Student, BYU

Alex Santiago-Anaya, Undergraduate, Virginia Tech

Hayden Ringer, M.S. Student, BYU

Spencer Giddens, Undergraduate and M.S., BYU

Garret Carver, Undergraduate, BYU

Cody Kesler, Undergraduate, BYU

Joshua Fullwood, Undergraduate, BYU

HONORS, AWARDS, PRIZES

Selected with Travel Support, Probabilistic Perspectives in Nonlinear PDEs Workshop, International Centre for Mathematical Sciences, June 2017

Selected with Travel Support, Gene Golub SIAM Summer School, Drexel University, August 2016

Small Projects Task Lead of the Year, IEM, 2007

Outstanding Senior, Virginia Tech Physics Department, 2004

Outstanding Senior, Traditional Option, Virginia Tech Mathematics, 2002

SKILLS

Programming languages: Julia, Python, C/C++, R, Bash

Parallel Computing: NVidia GPU (CUDA, OCCA), MPI, OpenMP, Pthreads

Other languages/tools: Git, MySQL/PostgreSQL, ParaView

CERTIFICATIONS

Engineer-in-Training (EIT), Virginia, 2009
